Anti-intrusion fogging security systems

PROFESSIONAL AT A COMPETITIVE PRICE

It is the most powerful machine in the market, ideal to protect large areas like big shops, warehouses, superstores or even to protect targets in open space. Shoots 1200 m³ of dense fog in 70 seconds. It is equipped with **two removable fog cylinders**.

UR Fog fogging systems are innovative in their technology and performances, in order to guarantee the most effective protection against thefts and they have different patents.

UR Fog fogging systems are certified after European regulation. Fog fluid is assessed as not dangerous for people and animals and does not leave residuals.

A unique serial bus to plug on the electronic board an add on card that allows to easily interface the machine with alarms and to control the fogging system even from remote. A standard protocol is available for all machines.

Fast electronic board

Battery pack

Powerful and fast fogging system, can cover up to **3600 m³ in 70 seconds** (1200 m³ recommended visibility).

Patented double fog cylinder is the best solution to shoot fog, tanks are easy to change and disposable. When the first cylinder is empty the machine switches automatically to the second one even during the same shot.

Vertical / horizontal recharge
Liquid quantity 600 ml

Easy to change cylinder

Another exclusive, patented and very useful plus that allows to detect automatically if the nozzle is tampered and sends an advise signal.

Thanks to the massive insulation UR FOG fogging systems have a very low power consumption and can shoot f or a long time in absence of mains power; temperature is constantly stable.

Long lasting operation time without mains
The innovative thermal insulation of the heater allows UR Fog systems to work for a long period of time without mains power: from 1,5 h up to 3,5h!
